PROFESSIONAL SUMMARY

IT professional with 3+ years of progressive experience spanning full-stack web development, system analysis, and application support across government and private sectors. Specialises in architecting and enhancing enterprise systems, from a ColdFusion-based financial management platform at FRIM to PHP/Python multi-tenant applications, while delivering measurable gains in operational efficiency. Skilled at bridging technical and business stakeholders to translate complex requirements into reliable, maintainable solutions. Holds a Bachelor of IT (Hons) from UKM.

WORK EXPERIENCE

Penolong Pegawai Teknologi Maklumat, Forest Research Institute Malaysia (FRIM) **Apr 2026 – Present**

- Worked closely with finance stakeholders and fellow developers to architect and enhance an internal financial management system, supporting end-to-end financial workflows across multiple finance units.
- Engineered security hardening measures including CSRF token validation, XSS prevention, parameterised queries, role-based access control, and session security, reducing vulnerability exposure across 6+ modules.
- Migrated system datasource architecture from a single connection to three dedicated, purpose-specific sources, improving query isolation and maintainability.
- Collaborated with finance officers to map legacy workflows, ensuring accurate business logic re-implementation and zero data loss during module redevelopment.

IT Application Analyst, Segi Value Holdings Sdn Bhd **Aug 2024 - March 2026**

- Developed, maintained, and troubleshot enterprise software using PHP, Bootstrap, SQL, Python, and JavaScript, reducing recurring defect rate by streamlining debugging and documentation practices.
- Delivered system enhancements and upgrade packages that boosted application efficiency, meeting SLA requirements across business units.
- Partnered with business analysts to analyse, redesign, and document software applications, ensuring alignment with evolving company requirements.

Assistant Admin, Qube Integrated Malaysia Sdn Bhd **Apr 2024 - Jul 2024**

- Managed 500+ data entries and 200+ files; coordinated scheduling for a team of 10, maintaining 100% supply and correspondence continuity.
- Compiled, formatted, and proofread 50+ tender documents, ensuring regulatory compliance and on-time submission across all deadlines.
- Liaised with 4+ internal departments and 10+ external parties to consolidate approvals and gather project-critical information.

Protege, Hospital Angkatan Tentera Tuanku Mizan **Aug 2023 - Apr 2024**

- Architected a medication inventory monitoring system (HTML, PHP, MySQL, CSS, JS) that revolutionised tracking accuracy and cut operational overhead by 50%, exceeding benchmark targets.
- Led development of a pharmacy store management system, streamlining dispensary workflows and reducing turnaround time by 30%.
- Analysed data from 50+ sources to surface actionable insights, contributing to a 20% uplift in clinical decision-making speed.
- Increased team productivity by 25% through process documentation, data quality controls, and enhanced administrative workflows.

IT Part-time, University College MAIWP International (UCMI) **Mar 2023 - Jul 2023**

- Reconfigured Google Workspace settings across 15 applications, achieving a 20% gain in operational efficiency and 15% boost in team productivity.
- Oversaw full staff data migration into a new HR application system with 90% accuracy, slashing processing overhead by 40%.
- Optimised student registration workflows in MySQL Workbench, reducing data entry time by 50% while maintaining data integrity.
- Collaborated on staff card redesign using Adobe Illustrator, lifting visual quality scores by 40%.

EDUCATION

Bachelor of Information Technology with Honors. **Oct 2020 - Nov 2023**
Universiti Kebangsaan Malaysia, Bangi

- CGPA: 3.72
- Thesis on "Cyber Security Risk Assessment Mobile Application".

Diploma in Digital Technology **Jun 2017 - Nov 2019**
Politeknik Ungku Omar, Ipoh

- CGPA: 3.76
- Major in Information Security

SPM (Malaysian Certificate of Education) **Jan 2011 - Dec 2016**
SMK Batu Muda, Kuala Lumpur

- Obtained distinction in English Language, Science, Mathematics, Malay Language, History and Fundamental of Economic.

PROJECTS

- Developed a Cyber Risk Calculator app, improving risk evaluation for 20+ users.
- Built a shop management system for 50+ products using PHP, HTML, CSS, and JavaScript.
- Created an e-commerce site with Magento on Amazon LightSail, handling 100+ transactions.

ACHIEVEMENTS

UKM Cyber Security **2021**

- Obtained a Professional Certificate in Cyber Security Protection from UKM.

Final Year Project **2019**

- Gold Medal & 3rd Place (Best Project Overall), Mini Technology & Creative Discovery Competition, Politeknik Ungku Omar
